

PAYROLL TIMECARDS

Tap to clock in. No more time theft.

Employees clock in and out from their phone — verified by GPS and biometric authentication, never typed into a paper timecard. Managers approve in the dashboard, AI flags anything unusual, and **approved entries sync to Spire payroll automatically**. No more buddy punching. No more data entry.

Spire sync
Rounding, OT, dept codes applied automatically

Three jobs. Done from a phone.

TIME & PAY

1
Mobile Clock In/Out

Employees clock in and out from their phone — start of shift, lunch, breaks, end of day. Total hours calculated automatically.

One-tap	Clock in / out
GPS	Captured per event
Breaks	Tracked
Hours + OT	Auto

2
Anti-Theft Security

Biometric authentication and GPS verification make buddy punching and ghost shifts effectively impossible.

Face ID / PIN	Every clock-in
GPS confirms	Right location
Buddy punching	Blocked
Configurable	Your rules

3
AI Pattern Recognition

Ingrid watches every clock-in and flags the patterns no human is paid to spot — chronic lateness, suspicious lunches, after-hours edits.

Late every Monday	Caught
Long lunches	Flagged
Unusual location	Alerted
Pre-payroll	Reviewed

WHY IT MATTERS

From phone tap to Spire payroll.

Time entries used to mean paper, spreadsheets, and the honour system. Ingrid replaces all of it. Employees tap. GPS verifies. AI watches the patterns. Managers approve in seconds. Spire receives the entries with rounding, overtime, and department rules applied. No data entry. No time theft. No surprises on payroll day.

Why payroll teams love it

- ✓ **Zero data entry**
No more typing timecards into Spire. Approved entries flow in automatically — rounding, overtime, and dept allocations applied.
- ✓ **GPS verification**
Confirms the employee is at the right job site or location at the moment of clock-in. No more "I'm on my way" timecards.
- ✓ **Configurable rules**
Rounding, overtime thresholds, break policies, department codes — all set to your specific payroll requirements.
- ✓ **No buddy punching**
Biometric authentication makes it impossible. Each clock-in is verifiably the actual employee, not a friend at the next station.
- ✓ **AI catches the patterns**
Chronic lateness, long lunches, after-hours edits — surfaced before payroll runs, not after the cheques go out.
- ✓ **Mobile-first**
Designed for how field employees actually work — phone in hand. Web dashboard for office staff and managers.

Ready to eliminate time theft?

Watch an employee clock in on their phone, see GPS verification on the manager dashboard, and the entry post to Spire payroll — in two minutes.
